

Moving Water is where children and adults investigate water's sensory and physical properties, explore the functions and interconnection between the Erie Canal and its engineering work, control water's movement to generate power and immerse themselves in the roles of Erie Canal boat workers and passengers.

Primary Learning Domain: Exploring STEM concepts through hands-on experimentation.

Secondary Learning Domains: Developing socially and emotionally through interaction with peers and adults. Fostering a sense of community and culture.

Learning Category	0-1 years	1-3 years	3-5 years	5-7 years	7 + years
Social and Emotional Development	Interaction with Adults				
		Interaction with Peers			
		Adaptive Social Behavior			
Communication, Language, and Literacy		Reading			
		Listening Skills			
Community and Culture		Community			
			Civic responsibility		
			History		
STEM		Scientific Thinking			
			Technology		
			Critical and Analytic Thinking		
				Measurement	
Arts/Arts Appreciation		Analyze and Critique			
			Technology		
Physical Well-Being, Health, and Motor Development	Sensorimotor				
		Gross Motor			
		Fine Motor
